Version 1.1

Is Character Overview

Since 1.1, materials have an option "Is Character", set as true by default.

Is Character is TRUE

When "Is Character" checked, the material works exactly as it was in version 1.0.

This is the preferred option for characters.

When "Is Character" checked, the material works exactly as it was in version 1.0.

This is the preferred option for characters.

Is Character is FALSE

When "Is Character" checked, the material works differently than it was in version 1.0.

This is the preferred option for large elements and elements which are larger than taller, like cars, planes ...

Here is an example for a car:
